

Session 13a: The role of Government in HiAP

Health in All Policies Training
Course

Khartoum, Sudan 29 – 31 May, 2018

Erik Blas

HiAP results chain

Review of national plans and policies

Inequity Dimensions (2030 – SDG Agenda)

Income

Gender

Age

Race

Ethnicity

Migratory status

Disability

Geographical location

Other characteristics

Review dimensions

Determinants and health impact on population group

Economic, social and environmental

Positive health impact

Negative health impact

More knowledge needed?

Mitigation

Ways to reduce negative and enhance positive impacts

Co-benefits

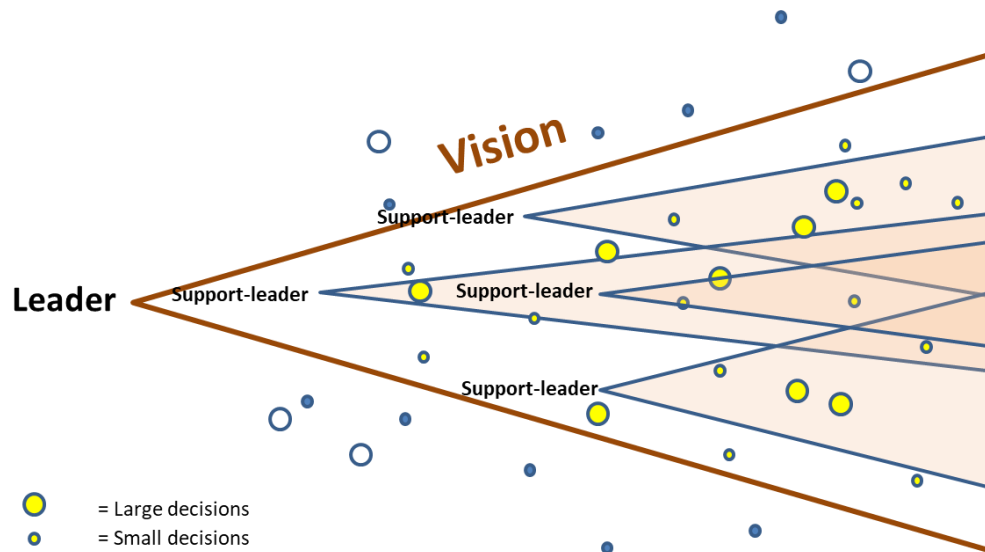

Positive mitigation effects – on primary objectives

Monitoring

Ways to integrate indicators, early warning and reporting

Evaluation

How to integrate?

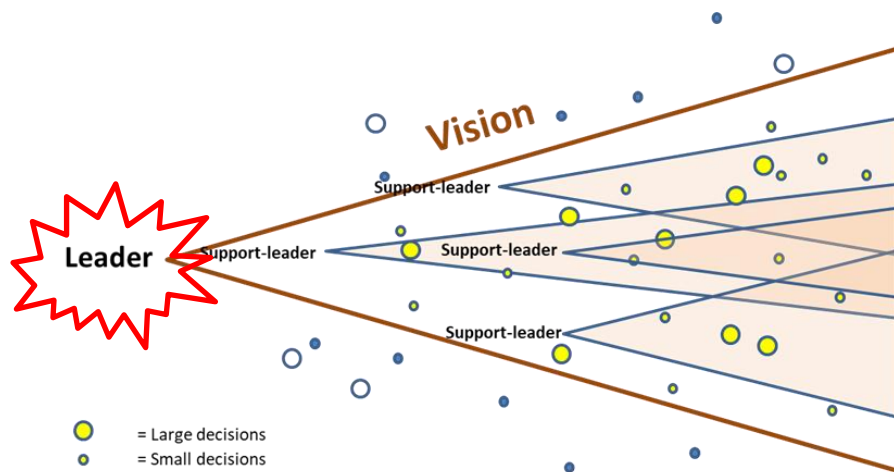

Future population situation

- To have halted the increase in the three most rapidly growing **burdens of disease**.
- To have reduced the level of the attribute and exposure **risk factor** with the highest prevalence.
- To be among the three **best-in-class** countries with respect to disease 1, 2, 3... (GBD bench-marking).
- To have reduced the **equity gaps** (health, economic and social participation) for population-groups A, B, and C
- Etc

How decisions affecting population health will be taken

- New public health act requiring social, **health and health equity impact assessment** for all major policy decisions
- Cabinet holding **ministries accountable** for their impact on social determinants, health and health inequity
- Parliament to consider and be guided by biennial national population health reports and hold **government accountable**
- Culture and praxis of **intersectoral co-design** of new policies with potential impact on social determinants, health and health equity
- Etc.

Five check points for spotting HiAP-leadership potential

- *Integrity*
- *Vision*
- *Communication*
- *Relationships*
- *Persuasion*

Exercising and growing HiAP-leadership

- **Hints on enablers**
 - Clear **HiAP vision** providing common direction and underscoring values
 - Supportive **organizational structures**
 - **Opportunities** for cross-sectoral learning, peer-support, and joint problem-solving.
 - **Coaching** and process consultation
- **Hints on inhibitors**
 - **Lack of individual recognition** from senior executives, including function not reflected in post description and appreciated in performance appraisal
 - Sectoral and organizational **silos** in terms of both budget and success criteria
 - Weak high-level **coordination** and **accountability** across sectors (governance)

HiAP Policy Champions

- **Policy Champions**
 - Takes an extraordinary interest in adoption, implementation and success of the cause
- **If no suitable Policy Champion**
 - Even the best intended policy change process risks stalling
- **Policy Champions need!!!**
 - Nurturing and growing
 - Tracking and supporting – e.g., HiAP Policy Champions Peer Group
 - Succession planning
